ANDREW MIGLIORE, VP OF ENGINEERING & SECURITY OFFICER

WHY WHISTIC

I've looked at multiple systems and approaches trying to solve the vendor governance Gordian Knot. The following features have really streamlined the whole process for us:

- ▶ Integrating the NDA process with the ability to override,
- ▶ Ability to delegate to other team members, such as sales
- ▶ Ability to share our security profile to prospects early in the sales process
- ▶ Ability to add compliance/certificate badges, policies, test results all in one place
- ▶ Ability to share standardized questionnaires like the CAIQ.

KEY BENEFITS/RESULTS

A single source of truth, managed in one place, with the ability for our extended team, that includes sales, to share our security and compliance profile securely with our customers and prospects.

The integration with Cloud Security Alliance's STAR registry to pull in existing and prospect vendor CAIQs really speeds up the whole vendor governance process, helps reduce the back and forth communication between the vendor and our compliance team. This, coupled with exposing a Whistic vendor request form to our internal organization allows us to vet vendors faster and reduce if not eliminate shadow IT.

SECURITY PROFILE

No more emailing encrypted zip files or determining how to transfer sensitive security artifacts. We now say accept the Whistic invitation to our security and compliance profile, and you will have access to all of our artifacts:

- ▶ SOC 2 + HITRUST
- ▶ CAIQ
- ▶ Policies
- ▶ BC / DR Drills
- ▶ Vulnerability scans
- ▶ Penetration testing results.

OVERALL WHISTIC EXPERIENCE

My experience has been excellent and I would definitely recommend Whistic to my colleagues. In fact, I feel like I am getting customized software because they are **very responsive** and have a mind to **productize suggestions** that work for all customers. Their solution has really dug into the core of the issues around vendor governance and are solving many of the pain points. **Whistic, compared to some other vendors, is like a quick marsupial that can dart in and out of the legs of the dinosaurs, running circles around them.**
